PROFESSIONAL SUMMARY

Computer Science graduate specializing in Data Science, with strong foundations in Data Structures & Algorithms, Machine Learning, and software development. Experienced in building AI-assisted applications, analytics dashboards, and responsive web experiences using Python, TensorFlow, React, and modern development tools.

TECHNICAL SKILLS

- Languages:** Python, Java, C, JavaScript
- AI / Data:** Machine Learning, TensorFlow, Scikit-learn, NumPy, Pandas, Data Analytics
- Web / Frameworks:** React, Flask, Django, Streamlit, REST APIs
- Tools:** Git, Docker, Chart.js, D3.js
- Core CS:** Data Structures & Algorithms, OOP, DBMS, Operating Systems

PROJECTS

AgroVetCare | AI + Agriculture

- Developed as part of the Smart India Hackathon 2024 finalist team; built an AI-assisted platform for crop and livestock disease detection using TensorFlow-based models, with practical reporting and field-oriented decision support.

Python • TensorFlow • Flask • Streamlit

Stock Portfolio Analyzer | Finance + Analytics

- Designed a portfolio intelligence dashboard for performance tracking, trend analysis, and data-driven investor decision support, with interactive visualizations and API-based data integration.

React • D3.js • APIs

Smart Dashboard | Real-Time Analytics

- Created a responsive analytics interface for real-time metric monitoring, decision-ready visual reporting, and streamlined user workflows.

JavaScript • Chart.js • Node.js

EDUCATION

B.Tech in Computer Science & Engineering (Data Science) — Techno Main Salt Lake | 2022–2026 | CGPA: 7.02

Class XII: 80% | **Class X:** 79%

ACHIEVEMENT

Smart India Hackathon 2024 — Finalist | Team Code & Conquer — developed AgroVetCare for crop and livestock disease identification.
